CREATE A HEALING GARDEN RETREAT

At times in life we feel the need to retreat in order to find the way forward again. A garden can give hope, upliftment and a sense of connection to the resilience within if it is created with care for our emotional needs.

In this course, you will be guided to look inwards at positive feelings, inspired to think differently about your garden, be guided to find the connection that is meaningful to you with its healing potential, then be assisted to design your personalised place of sanctuary. It will leave you with a plan for your healing space, a greater understanding of yourself and infused with passion to create it. Run over 3 x 7hr days, Cost includes all materials, inspiration + endless cups of tea & coffee.
